

COMPUTERS FOR KIDS A WORTHY PROGRAM

Albany Presbytery supports the Troy Area United Ministries (TAUM) in sponsoring "Computers for Kids," a special summer program teaching kids the inner and outer workings of computer hardware and software. After a four week class of learning everything from installing computer software to a presentation done in PowerPoint, they "graduate" and earn a computer of their very own. This is an important program which allows children, who may otherwise not have access to a computer, to bring home the one they worked on throughout the program.
